fifty - fifty

This course combines General English lessons with a programme of daily activities and excursions.

It is an opportunity to spend time studying English in a mixed nationality class (please look at our General English course page) in the morning and then to improve your listening and speaking skills whilst taking part in a busy social programme in the afternoon/after school.

Every day after classes you will meet our social programme organiser who will take you to do sport, punting, music, drama, swimming, singing workshops, cinema etc.

You will have the chance of spending more time with other students of different nationalities attending different classes in the morning and networking.
